DATA-DRIVEN EDUCATIONAL TURNAROUND FOR LAGOS STATE

Eko Excel OS

- To address severe infrastructure deficits and limited personalized attention for over 775,000 Lagos State students, Eko Excel OS deploys an automated, infrastructure-light academic engine that uses data-driven remediation to guarantee classroom mastery and exam success at zero additional budget.
- A systemic solution requiring **zero additional capital expenditure** — transforming outcomes using the assets and infrastructure Lagos State already possesses.

THE CRISIS

A Systemic Crisis, Not a Funding Issue

61%

WAEC Failure Rate

More than three-fifths of public secondary students failed basic graduation benchmarks in 2025.

2.7%

Budget Execution Rate

Chronic disbursement delays and deficit financing leave schools chronically underfunded.

20%

UNESCO Benchmark

Lagos allocations fall far short of the 15–20% recommended for education.

⚠ The traditional response to a 61% failure rate is to request more capital. Fiscal reality makes that impossible. We must **decouple educational success from state budget dependency.**

THE PROBLEM

A Failure of Design, Not Effort

60 Seconds Per Student On Average

In a 40-minute class of 40 students, personalized attention is structurally impossible.

45% Lost to Administration

Nearly half of working hours consumed by lesson design, question drafting, and manual grading.

The Result

Advanced students disengage, struggling students fall behind — burnout directly fuels the 61% failure rate.

THE SOLUTION

A Tripartite Accountability Ecosystem

Eko Excel binds the State, the Teacher, and the Parent into a continuous accountability loop — with the student at the center. **No new hardware required.**

The Teacher Effectiveness

A 60-second offline-first digital diary that converts classroom observations into structured data pipelines — no manual assessment design.

The Parent Engagement

Automated weekly progress reports delivered directly via WhatsApp. Every parent already uses it. Zero friction.

The State Insight Intervention

A unified Governance Command Center with real-time visibility across all schools and districts — from your desk.

EKO EXCEL OS: SYSTEMIC ARCHITECTURE | DATA-DRIVEN EDUCATIONAL TURNAROUND

Orchestrating existing assets for high-impact educational success without new budget.

INPUTS: CAPTURE micro-PROGRESS & OVERSIGHT

TEACHER FORCE MULTIPLIER

From Manual Admin Burden to High-Impact Teacher

10 Seconds. One Phone. AI Does the Rest.

Within **10 seconds** on a mobile phone, a teacher inputs topic, difficulty level, and question count. The AI handles everything that

✓ **Teachers save 15+ hours per week**
– zero manual marking required.

Select Topic

e.g., Algebra, Biology, English Language

Set Difficulty

WAEC Standard, calibrated automatically

Instant Generation

AI generates, distributes, marks, and provides diagnostic feedback on every continuous assessment

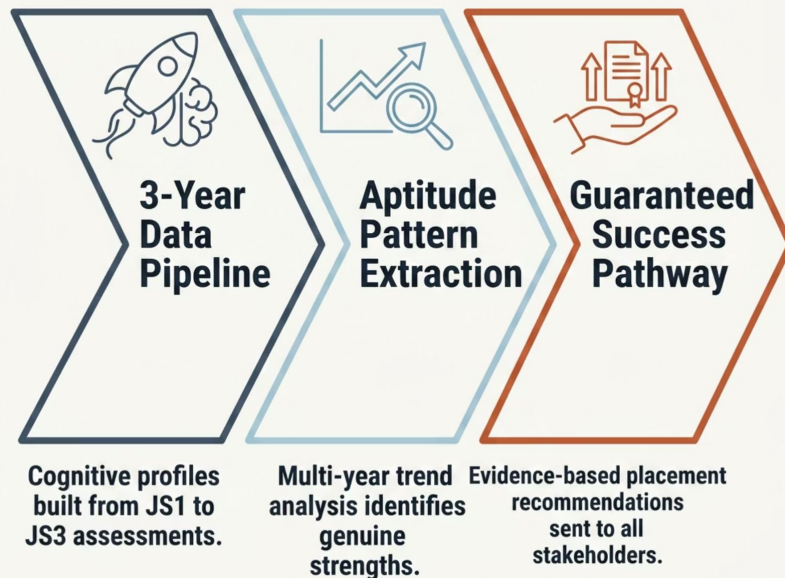

Removing the Guesswork from Academic Streaming

The Problem Today

JS3 students are streamed into Science, Arts, or Commercial based on shallow terminal exam marks or parental pressure — a mismatch that drives later failure.

The Eko Excel OS Approach

- **3-Year Data Pipeline:** Every assessment from JS1 to JS3 builds an unalterable cognitive profile
- **Aptitude Pattern Extraction:** Multi-year trend analysis identifies genuine strengths, not single-exam performance
- **Guaranteed Success Pathway:** Principals, parents, and the Ministry receive evidence-based placement recommendations

GOVERNANCE COMMAND CENTER

From Reactive Crisis Management to Real-Time Governance Command Centre

Dynamic QR Attendance

Teachers verify physical presence at the school gate — proxy signatures eliminated.

Live District Heatmaps

Performance data visualized by geography. A struggling classroom in Alimosho is flagged before noon.

Automated Escalation

Unresolved issues auto-escalate: Teacher → Principal → District Director within 48 hours.

Geographic Visibility

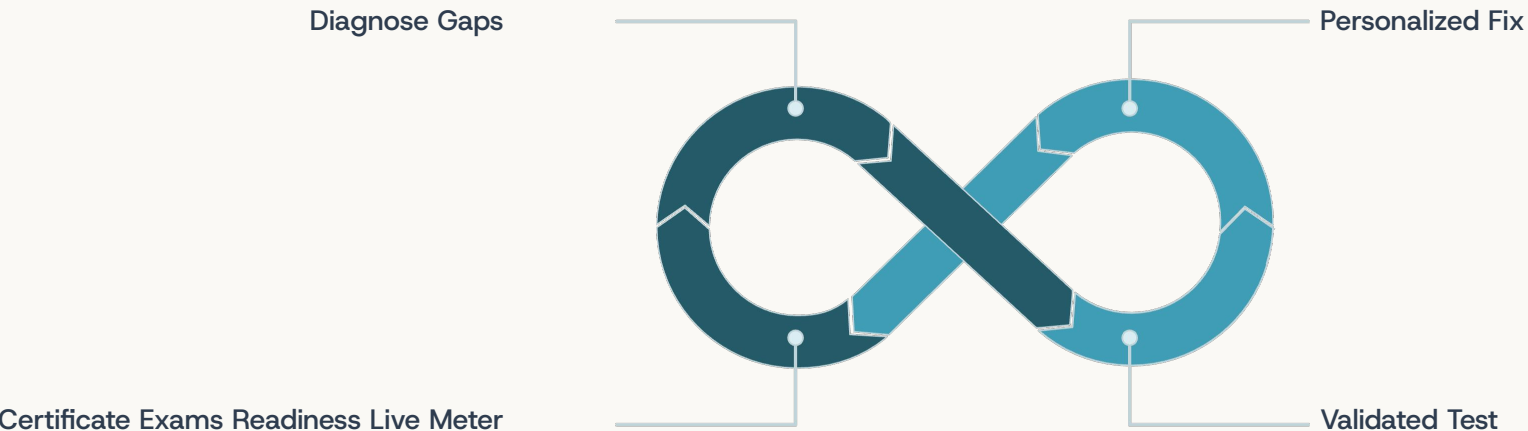

Interactive map coverage across all schools and districts simultaneously from the Ministry desk.

THE SCIENCE BEHIND GUARANTEED TURNAROUND

Personalized 24/7 Learning with AI Teaching Assistant

A continuous **Diagnose** → **Fix** → **Test** loop runs every 14 days, repeated 6–8 times per term. Learning gaps are crushed methodically.

This closed-loop cycle ensures no student falls through the cracks — gaps are identified, addressed, and validated before they compound into failure.

Real-Time Readiness Meter

An active readiness score weighted against WAEC topics and daily quiz performance.

Sub-Subject Hotspot Detection

Not "Math is weak" — but "Quadratic Equations is 30% below benchmark." Precision enables targeted intervention.

Personalized Brain Mapping

The system learns how each student learns best — visual, auditory, or kinesthetic — and adapts delivery accordingly.

IMPLEMENTATION

Zero Cost. Thirty Days. Full Deployment.

The Pilot Proposal

Given the current 2.7% budget execution rate, Eko Excel OS is not requesting an allocation. We propose a **controlled pilot in Education District I** at absolute zero cost to Lagos State Government.

Our team absorbs all initial operational risk. The State retains full authority to evaluate objective impact data before any long-term decisions.

₦0.00

Cost to Lagos State

30 Days

District I

Pilot geography

CALL TO ACTION

Authorization Requested

Approve the 30-day pilot in Education District I. No capital expenditure. No risk to the State. Just data — and the opportunity to see what world-class digital governance looks like.

Build the Ecosystem

A data-driven, world-class educational infrastructure for Lagos State.

Transform Outcomes

Move from 61% to 25% WAEC failure rate through systematic intervention.

Lead Africa

Position Lagos as the continent's foremost education technology leader.
