

INTERNAL TECH MEMO: Eko Learn Onboarding Strategy

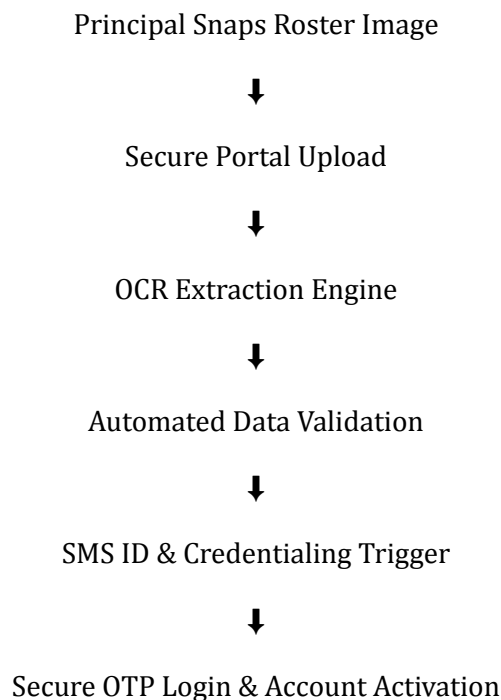

Date: June 24, 2026 | Subject: Implementation of Distributed Data Ingestion

1. Data Ingestion Pipeline

Our 'Snap-to-Digitize' model minimizes field operations by empowering school principals to act as the primary data ingestion point.

- Step 1: Principals record student data on standardized templates (Name, Class, Age, Phone).
- Step 2: High-resolution images of these documents are uploaded to our secure portal.
- Step 3: Our OCR engine extracts data into the relational database.
- Step 4: System flags incomplete/poor quality entries for immediate Principal re-submission.

2. Onboarding Workflow Diagram

3. Identity & Security

- Credentials: Unique Student ID + Mobile Number.
- Verification: Mandatory OTP challenge via SMS.
- Privacy: NDPR-compliant framework with Zero-PII storage outside isolated nodes.
